The Brief & Approach

The Ask

Build a marketing site for a fictional Kubernetes / DevOps consulting firm that could plausibly compete with **Vercel**, **HashiCorp**, **Datadog**, and **Stripe** on visual quality and engineering polish.

- Single-page layout, 10 sections
- Dark theme, animated, accessible
- Lighthouse 95+ across the board
- Production-grade code, not a mockup

My Approach

- Treat the spec as a real client brief — make ambitious design choices, not just literal-spec compliance

Tech Stack — and *why*

Framework & UI

- **Next.js 16 (App Router)** — RSC by default; only sections that need interactivity become client components (smaller JS payload)
- **React 19 + TypeScript 5** end-to-end
- **Tailwind CSS v4** — `@theme inline` tokens drive the K8S palette (deep navy, K8s blue, cyan)
- **shadcn/ui** on `@base-ui/react` — modern primitives with the `render` prop pattern instead of legacy `asChild`

Motion, Forms, SEO

- **Framer Motion 12** — scroll-reveal, staggered hero, animated architecture viz, `prefers-reduced-motion` respected

Design & Architecture Decisions

Design Language

- **Palette:** deep navy `#0B1220`, K8s blue `#326CE5`, cyan `#06B6D4` — pulled from the Kubernetes brand and tightened for enterprise feel
- **Glassmorphism cards** + radial gradient backdrops + subtle grid overlay — premium, never cluttered
- **Typography stack:** Space Grotesk for headings (geometric, modern), Inter for body (highly legible), JetBrains Mono for eyebrows / labels
- **Custom SVG architecture viz** in the hero — animated K8s control plane, worker nodes, pulsing data flows. No image weight; scales perfectly on any screen

Architecture Decisions

What Shipped + Live Demo

Page Sections (in order)

1. **Sticky Nav** — glass on scroll, mobile sheet menu, theme toggle
2. **Hero** — animated K8s architecture viz + 4 hero stats
3. **Trusted Technologies** — 12 tools, hover-animated
4. **Services** — 6 cards (Kubernetes, DevOps, Platform Eng...)
5. **Why Us** — 6 differentiators
6. **Case Studies** — 3 anonymized customer outcomes
7. **Delivery Process** — 4-step animated timeline
8. **Testimonials** — 3 enterprise quotes
9. **FAQ** — 6 questions, accordion
10. **Final CTA + Contact** — validated form, contact info, footer
